

I wish to comment on 02-33 and let you know, unequivocally, that myself and many in this country do not support your efforts to undermine TA1996 and your efforts to close the data market to exclusively ILEC's. I will be writing my representative to also inform her of my opinion, and hope that you can see the other side of this issue. In killing TA1996, you are effectively killing competition in the data market, and I hope you will reconsider.
